

Gerrit DÜthler

Cost Engineer · Estimator · Manufacturing Engineer

Reliable cost prices · faster quotes · margins you can defend

gerrit@duthler.info · Eindhoven, Netherlands · [linkedin.com/in/gerrit-d-90a50234](https://www.linkedin.com/in/gerrit-d-90a50234)

PROFILE

Cost engineer with a career from the shop floor to the calculation office — DAF Trucks, VDL ETG, Andritz, Wilting and Wärtsilä — so every cost price I produce is grounded in what actually happens at the machine. I build defensible cost prices for development, customer and non-standard work, keep quoting fast and transparent, and align engineering, purchasing, sales and business control on the same figure. Where the tooling falls short, I build it myself — automation and dashboards in Python, and Excel/VBA. Lean Six Sigma Green Belt.

CORE COMPETENCIES

Cost estimating & calculation · Should-cost · RFQ & quotation · Post-calculation · Make-or-buy · Bill of materials (BOM) · Margin & cost control · Value engineering · Lean Six Sigma (Green Belt) · Continuous improvement · Work preparation & routing · Manufacturing strategy · Supplier collaboration · SAP · Power BI · Excel/VBA · Python · CNC programming

PROFESSIONAL EXPERIENCE

Cost Engineer

Wärtsilä · 2021 – present

- Set the cost price for development, customer and non-standard projects — the reference figure engineering, sales, purchasing and business control all worked from.
- Translated technical choices into cost impact before decisions were made, as cost partner to engineering, sales, project management, purchasing and product management.
- Drove cross-functional cost-reduction and made budget-versus-actual transparent, so deviations surfaced early enough to act on.

Manufacturing Engineer

Wilting · 2019 – 2021

- Built the workshop and tool management from the ground up and ran purchasing of indirect goods and tooling.
- Led improvement projects that raised safety, quality and delivery reliability while taking cost out of the process.

Factory Engineer

VDL ETG · 2017 – 2019

- Defined make strategy and routing for complex high-tech products and produced the supporting manufacturing documentation.
- Owned running production as product owner — the link between design intent and what the factory actually makes.

Production Supervisor

Andritz Feed & Biofuel · 2011 – 2017

- Led the hardening shop and three production departments on clear KPIs, with coaching and HR responsibility.
- Drove structural improvements in quality, throughput and cost across the departments.

Production / Technical Engineer & Team Lead

DAF Trucks · 1987 – 2011

- Delivered process and product improvements, machine acceptance and the start-up of new production lines.
- Cut defects and improved line flow through continuous improvement and CNC programming; led and trained production teams.

EDUCATION

KMBO Mechanical Engineering, Eindhoven · LTS Mechanical Engineering, Eindhoven

CERTIFICATIONS

Lean Six Sigma — Green Belt & Yellow Belt
