

Gerrit Düthler

Cost Engineer · Estimator · Manufacturing Engineer

Reliable cost prices · faster quotes · margins you can defend

gerrit@duthler.info · Eindhoven, Netherlands · [linkedin.com/in/gerrit-d-90a50234](https://www.linkedin.com/in/gerrit-d-90a50234)

PROFILE

A cost engineer who makes the number trustworthy. Experienced across the shop floor and in costing at DAF Trucks, VDL ETG, Andritz and Wärtsilä, I know where cost really sits — and how to take it out. I turn engineering into defensible cost prices, win alignment across engineering, purchasing, sales and business control, and keep estimating fast and transparent. Lean Six Sigma Green Belt — hands-on, data-driven and pragmatic.

CORE COMPETENCIES

Cost estimating · Should-cost · Post-calculation · Lean Six Sigma (Green Belt) · Continuous improvement · Work preparation & routing · Manufacturing strategy · SAP · Power BI · Excel/VBA · CNC programming · Cross-functional collaboration

PROFESSIONAL EXPERIENCE

Cost Engineer

Wärtsilä · 2021 – 2026

- The single source of truth for cost: owned cost data and calculations across development, customer and non-standard projects.
- Trusted cost partner to engineering, sales, project management, purchasing and product management — turning technical choices into clear cost impact.
- Shaped cost strategy and drove cross-functional cost-reduction; made budget-vs-actual transparent so deviations surfaced early.

Manufacturing Engineer

Wilting · 2019 – 2021

- Purchasing of indirect goods and tooling; set up the workshop and tool management.
- Led improvement projects that raised safety, quality and delivery reliability while taking cost out.

Factory Engineer

VDL ETG · 2017 – 2019

- Defined make strategy and routing for complex products; produced product documentation.
- Improved and supported running production as product owner.

Production Supervisor

Andritz Feed & Biofuel · 2011 – 2017

- KPI-driven leadership of the hardening shop and three production departments, including coaching and HR.
- Drove structural process improvements that lifted quality, throughput and cost, and bridged the shop floor and management.

Production / Technical Engineer & Team Lead

DAF Trucks · 1987 – 2011

- Process and product improvements, machine acceptance and new production-line implementation.
- Cut defects and improved line flow through hands-on continuous improvement and CNC programming; led and trained production staff.

EDUCATION

KMBO Mechanical Engineering, Eindhoven (1985) · LTS Mechanical Engineering, Eindhoven (1981–1985)

CERTIFICATIONS

Lean Six Sigma — Green Belt & Yellow Belt
